RE: Letter of Recommendation

To whom it may concern:

It is great pleasure to provide this letter of recommendation for Petroleum Marine Consultants, LLC. Our company has worked with Paul and his staff for the past 10 years on numerous marina projects throughout the Southeastern United States, the Caribbean and Central America. His company has met all obligations, performed the work in a timely and professional manner and completed projects on time and on budget. Paul understands the unique environment and regulations for the marina industry both domestic and internationally and most important, the needs of our customer's users. His abilities to provide design/build services for marina fuel systems including all the required insurances for design and construction make Petroleum Marine Consultants, LLC a valuable member of our team.

Additional information or project references can be provided upon request.

Thanks,

Steve Ryder

Steve Ryder, Manager of Project Development
