Driscoll Children's Hospital Corpus Christi, TX

Hospital Renovation Costs Reduced by Having Miracle Method Refinish Existing Bathroom Tile Floors and Walls

BEFORE

AFTER

The Problem

Outdated bathrooms at Driscoll Children's Hospital were in need of an affordable upgrade. Damaged tile floors were leaking to the floors below and bathroom walls were ugly, dirty and worn. Renovations required a fast turnaround that could allow the hospital to maintain operations without the disruption of full demolition or replacement.

The Miracle Method Solution

Miracle Method proposed sealing the leaking tile with Mira-Seal, followed by refinishing the surface with a stone-look finish and clear coat for an updated look. Miracle Method's refinishing process transformed hospital bathrooms into a beautiful and modern look.

The Process

Two technicians repaired and refinished six sets of hospital bathrooms, about 125 square feet each. Bathrooms were completed in three day periods, in order to return them fully back to service over the weekends. Miracle Method began refinishing with a proprietary cleaning process on the tile walls and floors.

Technicians then made repairs to the tiles before grout lines were permanently sealed and restored. Lastly, a clear coating was applied for long lasting durability that eliminated moisture.

The Result

Miracle Method provided Driscoll Children's hospital with a cost-effective renovation solution over replacement. Bathrooms were no longer difficult to clean and sealed grout lines inhibit the growth of mold and mildew. Miracle Method's process minimized downtime, while taking the extra care to coordinate renovations between patient traffic. The facility director was very impressed with the beautiful upgrades that refinishing provided.
