Re: Letter of Recommendation for Day's Excavating, Inc.

To Whom It May Concern:

I am writing to provide Farmers Water Co.'s recommendation for Day's Excavating, Inc. ("Day's").

Farmers Water Co. has contracted directly or worked jointly with Day's on several large-scale pipeline projects. As a regulated water utility, Farmers Water Co. requires the highest standard of work to ensure that our customer's public health and safety is protected. Day's has continuously exceeded our expectations and produces a work product that is always timely completed and competitively priced.

Our trust in Day's is without question. As an example, Farmers Water Co. had a water main unexpectedly rupture the morning of January 5, 2011. The broken water main resulted in 25 homes being left without water service. Although Day's was working on another project for Farmers Water Co. at a different location, they were able to immediately respond to our emergency, mobilize to the site, and had the water main back in service within several hours.

Farmers Water Co. highly recommends Day's. Please feel free to contact me directly if you have any questions.

Sincerely,

Matthew Bailey
Executive Vice President
