

To whom it may concern;

Day's Excavation has worked on several projects for us in the past. These projects ranged from small to large mainline extensions, pavement replacement and various road improvements. Rodney Day and his crew have always been a pleasure to work with. The projects have been completed in a timely and professional manner. Their expertise in many areas of construction has enabled them to adapt well to any changes which have arisen and quickly respond to any concerns we have had. We definitely would use Day's Excavation on future projects. We highly recommend them for any construction projects you might have. Please feel free to call me if you have any questions.

Sincerely,

John Meyer (520) 349-0479
