

To Whom It May Concern:

Tri-County Hospital hired Four Seasons Energy Efficient Roofing Inc. in 2007 to install a Duro-Last roof on one of our existing buildings. Darrell was very timely and professional through the entire process and helped us reduce costs by re-using all the existing insulation. The installers were professional and excellent to work with and finished the job on schedule.

The Duro-last roof was punctured in a wind storm in the spring of 2008. We contacted Four Seasons and they had their personnel on site the very next day to evaluate and fix the problem. We were very impressed with their response time and appreciate the commitment they have to their customers. We would feel very comfortable having Four Seasons roofing install our next Duro-Last roof. Their service is truly what makes the difference for Tri-County Hospital.

Please contact me with any questions (218) 631-5229 or e-mail nathan.hendrickson@tricityhospital.org.

To Whom It May Concern:

Sullivan Candy & Supply had our roof repaired in the fall of 2011 by Four Seasons Roofing from the Twin Cities area. I had concerns about their distance from my business and a quick response to any possible leaks.

Darrell and his staff have been unbelievable. Their response and attention to detail has been excellent.

I would highly recommend Four Seasons Roofing for any job. Do not worry about distance – they will be there if needed. I have one more section of roofing to do and I will be contacting Four Seasons for that repair.

Sincerely

Tom Sullivan

Subject: **RE: Letter of Reference**

I just want to say FOUR SEASONS replaced our roof last summer (2012) over our main Gym. We are located in south west corner of M.N. about 3hrs from Twin Cities. They got the quote, gave us the date they were coming and showed up and did a very professional job! Job site was kept clean, they were done in 3 days I believe. We did have couple small leaks, but they were here right away and took care of them. They have very good employ's, explained things very well when asked. I really like the roof, very tuff and will keep the building much cooler in the summer. Thanks again Darrell and feel free to pass this on to future customers and if anyone would like to contact me with any questions feel free to pass my number on.

Mark,

Thank you for writing a letter for us. I really do appreciate it! I am bidding on a project about 4 1/2 hours from us and they just want to be reassured that we are prompt, courteous and responsible. And that if/when there was an issue we addressed it right away and had crews available to respond immediately.

Dear Darrell:

Over the past few years we have had Four Seasons replace and recover a variety of roofs at Hoot Lake Plant. I was happy with Darrell and his crew's ability to work around our requirements and within our safety standards.

Four Seasons was very helpful during the prebid process by suggesting alternative options to full roof replacement of our built up flat roof system. Darrell suggested that we retain the existing roof by leveling the existing pea rock and adding insulation to form a base for the Duro-last roofing system. This suggestion was ultimately implemented save me around half my original budget. This allowed me to effectively double the square footage of roof that I was going to replace.

The crew installed the two roofs professionally and quickly. They are very knowledgeable in their craft and taught me a few things to look for in my maintenance role at the plant.

The overall quality of their work is greatly appreciated and aided Four Seasons in winning additional contracts at the plant. I would recommend Four Seasons Roofing for all new, recovering and maintenance work in industrial applications like ours.

Sincerely,

Jeff Schlotfeld

Subject: **Recommendation**

March 29, 2013

I was the Facilities Management Director at the Ely Bloomenson Community Hospital for the past 40 years retiring January 1, 2012. Over the years I have dealt with many roofing companies, most of them within 75 miles from Ely.

I was a little nervous when I was first looking at Four Seasons Energy Efficient Roofing because of the four and a half hour drive from Minneapolis to Ely. Darrell assured me there would be no problem in responding to any possible repairs.

I decided to take the chance and it was one of the best decisions I could have made. Not only did they do a fantastic job of installing the DuroLast roof but cleaned up every last scrap that was left. We did have a couple of small problems shortly after the installation and their response was better than expected. Everything was taken care of and we have not had any callbacks since those initial items.

I would highly recommend Darrell Schaapveld and Four Seasons Energy Efficient Roofing to anyone wanting a quality roofing installation and dependable, timely service.

To Whom it May Concern,

We have been very please with the Dura Last product. We installed it 7/14/2010 have only had a couple of leaks and that was right at the beginning with welded seams. Four Seasons always came out immediately and fixed the leaks. Our facility is about 4 1/2 to 5 hr from the Minneapolis area. Four Seasons, in my opinion, is very qualified to handle any project big or small, near or far. They are punctual, courteous, keep the job site clean and are very knowledgeable of the Duro-Last Roofing System and its installation.

Sincerely
