Re: Shadowfax Corporation Project

To Whom It May Concern:

My experience working with Paramount Contracting, Inc. on the Shadowfax project was nothing short of incredible. The project was a renovation of an occupied one-story building located in downtown York totaling 53,000 square feet. Paramount expertly installed EFIS on all exterior surfaces, which varied from masonry and metal siding to wood framed structure. The project consisted of many challenges beyond the varying substrate, like intricate and abnormal details throughout. Despite a tight schedule, delays, and inhospitable weather, Paramount exceeded all expectations, playing a critical role in the project's success.

Paramount's flexibility and commitment to safety exceeded industry standards, while their team approach kept things running smoothly from the top down. Paramount's knowledge and expertise enabled them to make systems recommendations while consulting with the architect and owner on critical decisions in a timely manner. They truly embodied the team approach, putting quality, schedule and owner satisfaction before their own resources on several occasions when making recommendations.

It cannot be overstated how essential Paramount was to the success of this project. Their team played a vital role in revitalizing this building from a dilapidated structure to a facility the Shadowfax team is truly proud to work in. I thank the Paramount team for their hard work, and look forward to working with them again on future projects.

Sincerely,

Mitchel McLaughlin  
Project Manager
